*There is no assurance that the Fund's investment objective will be attained. Past performance is no guarantee of future results. You should consider the investment objective, risks, and charges and expenses of the Fund carefully before investing. The Fund's investment policies, management fees, and other matters of interest to prospective investors may be found in its filings with the SEC, including its annual and semi-annual reports. *Please read the reports carefully before investing.*

*\* Shares of closed end funds frequently trade at a discount from their NAV. This characteristic is a risk separate and distinct from the risk that the Fund's NAV has decreased in the past, and therefore could decrease in the future, as a result of its investment activities. Neither the Investment Manager nor the Fund can predict whether shares of the Fund will trade at, below, or above NAV. The risk of holding shares of the Fund that might trade at a discount is more pronounced for investors expecting to sell their shares in a relatively short period of time after acquiring them because, for those investors, realization of a gain or loss on their investments is likely to be more dependent upon the existence of a premium or discount than upon portfolio performance. The shares of the Fund are designed primarily for long term investors and should not be considered a vehicle for trading purposes. The NAV of the Fund shares typically will fluctuate with price changes of the Fund's portfolio securities, and these fluctuations are likely to be greater in the case of a fund which uses leverage, as the Fund may from time to time. In the event that shares of the Fund trade at a premium to NAV, there is no assurance that any such premium will be sustained for any period of time and will not decrease, or that the shares of the Fund will not trade at a discount to net asset value thereafter. The market price for the Fund is based on supply and demand which fluctuates daily based on many factors, such as economic conditions and global events, investor sentiment, and security-specific factors.*

*Our views and opinions regarding the prospects of our portfolio holdings, the Fund, and the economy are "forward looking statements" as defined under the U.S. federal securities laws which may or may not be accurate and may be materially different over future periods. Generally, the words "believe," "expect," "intend," "estimate," "anticipate," "project," "will," "may," "should," "plan," or the negative of such terms and similar expressions identify forward looking statements, which generally are not historical in nature. Forward looking statements are subject to certain risks and uncertainties that could cause actual results to materially differ from the Fund's historical*

*experience and its current expectations or projections indicated in any forward looking statements. These risks include, but are not limited to, equity securities risk, corporate bonds risk, credit risk, interest rate risk, leverage and borrowing risk, additional risks of certain securities in which the Fund invests, market discount from net asset value, distribution policy risk, management risk, and other risks discussed in the Fund's filings with the Securities and Exchange Commission. We disclaim any obligation to update or alter any forward looking statements, whether as a result of new information, future events, or otherwise. Thus you should not place undue reliance on forward looking statements, which speak only as of the date they are made.*

*This communication is provided for informational purposes only. This is not a prospectus, circular, or representation intended for use in the purchase of shares of the Fund or any securities mentioned in this communication. This communication shall not constitute an offer to sell or the solicitation of an offer to buy, nor shall there be any sale of, these securities in any state in which such offer, solicitation, or sale would be unlawful prior to registration or qualification under the securities laws of any such state, or an exemption therefrom.*

*Investment products, including shares of closed end funds and mutual funds, are not federally or FDIC insured, are not deposits or obligations of, or guaranteed by, any financial institution and involve investment risk, including possible loss of principal and fluctuation in value. Consult with your tax advisor or attorney regarding specific tax issues.*
