Fellow Shareholders:

We are pleased to welcome our new shareholders and to submit this 2009 Annual Report for Foxby Corp. As a closed end fund seeking total return, the Fund uses a flexible strategy in the selection of securities and is not limited by the issuer's location, industry, or market capitalization. The Fund may invest in equity and fixed income securities of both new and seasoned U.S. and foreign issuers, including securities convertible into common stock and debt securities, closed end funds, and mutual funds. The Fund may also invest defensively in high grade money market instruments. A potential benefit of its closed end structure, the Fund may invest without limit in illiquid investments such as private placements and private companies. The Fund may employ aggressive and speculative investment techniques, such as selling securities short, employing futures and options, derivatives, and borrowing money for investment purposes, an approach known as "leveraging."

Market Report

In our 2009 Semi-Annual Report, we noted some reasons for cautious optimism about the U.S. economy, and we have been pleased to see improvements over time. The Federal Reserve Districts recently reported that, although economic activity remains at a low level, conditions have improved modestly and more broadly geographically. The Districts noted that consumer spending in the recent 2009 holiday season was greater than in 2008, but short of 2007 levels. The Districts also noted that auto sales have been stable or increasing slightly, as nonfinancial services activity generally improves. Meanwhile, the report suggested that manufacturing activity has held steady and the outlook was optimistic, notwithstanding "cautious" spending plans. Offsetting favorable data on inflation were the statistics indicating that labor market conditions remain weak. Indeed, the Bureau of Labor Statistics reported 85,000 U.S. job losses in December and an unemployment rate of 10%. A positive note was sounded by the Federal Reserve Districts in reporting that toward the end of 2009 home sales generally increased.

Important for investors was the recent statement by the Federal Reserve Open Market Committee to the effect that the Committee will maintain the target range for the federal funds rate at 0% to 1/4%. The Committee suggested that it continues to anticipate that economic conditions, including subdued inflation trends, low rates of resource utilization, and stable inflation expectations, are likely to lead to low levels of the federal funds rate for an extended time. Further, the Committee noted that to boost mortgage lending and housing markets and to improve overall conditions in the credit markets, the Federal Reserve is planning to purchase about \$1.25 trillion of agency mortgage-backed securities and \$175 billion of agency debt.

Total Return Allocation

In view of these challenging market conditions, the Fund's strategy in 2009 was to substantially reposition the portfolio. We refocused on larger, quality companies with attractive valuations, using fewer, but more concentrated, individual positions. With holdings of some of the largest and best known U.S. companies in insurance, technology, banking, and finance, the Fund's total return for 2009 was a gratifying 30.95%, with a market total return of 85.45%, reflecting a reduced market price discount to net asset value. In the same period, the Standard & Poor's 500 returned 26.46%, according to Morningstar. Our current view of financial conditions suggests that the Fund may benefit during 2010 from its flexible portfolio approach, investing oppor-

tunistically in a variety of markets and employing aggressive and speculative investment techniques as deemed appropriate.

At December 31, 2009, the Fund's top ten holdings comprised approximately 58% of its net assets. As the Fund pursues its total return objective through its flexible investment approach, these holdings and allocations are subject to substantial change at any time.

We thank you for investing in the Fund and share your enthusiasm for the Fund, as evidenced by the fact that affiliates of CEF Advisers, Inc., the Fund's Investment Manager, own approximately 24.5% of the Fund's shares. We look forward to serving your investment needs over the years ahead.

Sincerely,

A handwritten signature in blue ink, appearing to read "Bassett S. Winmill", is centered on the page. The signature is fluid and cursive, with a prominent horizontal stroke across the middle.

NOTES TO FINANCIAL STATEMENTS - DECEMBER 31, 2009

1. Organization and Significant Accounting Policies

Foxyby Corp., a Maryland corporation registered under the Investment Company Act of 1940, as amended (the "Act"), is a non-diversified, closed end management investment company whose shares are quoted over the counter under the ticker symbol FXBY. The Fund's non-fundamental investment objective is total return which it may seek from growth of capital and from income in any security type and in any industry sector. The Fund retains CEF Advisers, Inc. as its Investment Manager.

The following is a summary of the Fund's significant accounting policies.

Security Valuation – Securities traded primarily on a U.S. national securities exchange ("USNSE") are valued at the last reported sale price on the day the valuations are made. Securities traded primarily on the Nasdaq Stock Market ("Nasdaq") are normally valued by the Fund at the Nasdaq Official Closing Price ("NOCP") provided by Nasdaq each business day. The NOCP is the most recently reported price as of 4:00:02 p.m. ET, unless that price is outside the range of the "inside" bid and asked prices (i.e., the bid and asked prices that dealers quote to each other when trading for their own accounts); in that case, Nasdaq will adjust the price to equal the inside bid or asked price, whichever is closer. Because of delays in reporting trades, the NOCP may not be based on the price of the last trade to occur before the market closes. Securities that are not traded on a particular day and securities traded in foreign and over the counter markets that are not also traded on a USNSE or Nasdaq are generally valued at the mean between the last bid and asked prices. Certain of the securities in which the Fund invests are priced through pricing services that may utilize a matrix pricing system which takes into consideration factors such as yields, prices, maturities, call features, and ratings on comparable securities. Bonds may be valued according to prices quoted by a bond dealer that offers pricing services. Open end investment companies are valued at their net asset value. Foreign securities markets may be open on days when the U.S. markets are closed. For this reason, the value of any foreign securities owned by the Fund could change on a day when stockholders cannot buy or sell shares of the Fund. Securities for which quotations are not readily available or reliable and other assets may be valued as determined in good faith by the Investment Manager under the direction of or pursuant to procedures established by the Fund's Board of Directors. Due to the inherent uncertainty of valuation, these values may differ from the values that would have been used had a readily available market for the securities existed. These differences in valuation could be material. A security's valuation may differ depending on the method used for determining value. The use of fair value pricing by the Fund may cause the net asset value of its shares to differ from the net asset value that would be calculated using market prices.

Foreign Currency Translation – Securities denominated in foreign currencies are translated into U.S. dollars at prevailing exchange rates. Realized gain or loss on sales of such investments in local currency terms is reported separately from gain or loss attributable to the change in foreign exchange rates for those investments.

Short Sales – The Fund may sell a security it does not own in anticipation of a decline in the market value of the security. When the Fund sells a security short, it must borrow the security sold short and deliver it to the broker/dealer through which it made the short sale. The Fund is liable for any dividends or interest paid on securities sold short. A gain, limited to the price at which the Fund sold the security short, or a loss, unlimited in size, will be recognized upon the termination of a short sale.

Derivatives – The Fund may use derivatives for a variety of reasons, such as to attempt to protect against possible changes in the value of their portfolio holdings or to generate potential gain. Derivatives are financial instruments that derive their values from other securities or commodities, or that are based on indices. All of a Fund's portfolio holdings, including derivative instruments, are marked-to-market each day with the change in value reflected in unrealized appreciation or depreciation. Upon disposition, a realized gain or loss is recognized accordingly, except when taking delivery of a security underlying a contract. In these

NOTES TO FINANCIAL STATEMENTS - DECEMBER 31, 2009 (CONTINUED)

instances, the recognition of gain or loss is postponed until the disposal of the security underlying the contract. Risk may arise as a result of the potential inability of the counterparties to meet the terms of their contracts.

Summarized below is a specific type of derivative usable during the period.

Futures Contracts – The Fund is subject to equity price risk, interest rate risk, and foreign currency exchange rate risk in the normal course of pursuing its investment objective. The Fund may use futures contracts to gain exposure to, or hedge against changes in the value of equities, interest rates, or foreign currencies. A futures contract represents a commitment for the future purchase or sale of an asset at a specified price on a specified date. Upon entering into a futures contract, the Fund provides the broker/dealer an amount of cash or securities at least equal to a certain percentage of the contract amount. This is known as “initial margin.” Subsequent payments (“variation margin”) are credited to or debited from the Fund each day, depending on the daily fluctuation of the value of the contract. The daily change in the contract is included in unrealized appreciation or depreciation on investments and futures contracts. The Fund recognizes a realized gain or loss when the contract is closed. Futures transactions sometimes may reduce returns or increase volatility. In addition, futures can be illiquid and highly sensitive to changes in their underlying security, interest rate, or index, and as a result can be highly volatile. A small investment in futures could have a large impact on the Fund’s performance. With futures, there is minimal counterparty credit risk to the Fund because futures are exchange traded and the exchange’s clearinghouse, as counterparty to all exchange traded futures, guarantees the futures against default.

The Fund did not engage in futures transactions during the period.

Investments in Other Investment Companies – The Fund may invest in shares of other investment companies (or entities that would be considered investment companies but are excluded from the definition pursuant to certain exceptions under the Act) (the “Acquired Funds”) in accordance with the Act and related rules. Shareholders in the Fund bear the pro rata portion of the fees and expenses of the Acquired Funds in addition to the Fund’s expenses. Expenses incurred by the Fund that are disclosed in the Statement of Operations do not include fees and expenses incurred by the Acquired Funds. The fees and expenses of the Acquired Funds are included in the Fund’s total returns.

Security Transactions – Investment transactions are accounted for on the trade date (the date the order to buy or sell is executed). Realized gains or losses are determined by specifically identifying the cost basis of the security sold.

Investment Income – Dividend income is recorded on the ex-dividend date or in the case of certain foreign securities, as soon as the Fund is notified. Interest income is recorded on the accrual basis. Taxes withheld on foreign dividends have been provided for in accordance with the Fund’s understanding of the applicable country’s tax rules and rates.

Expenses – Estimated expenses are accrued daily. Expenses directly attributable to the Fund are charged to the Fund. Expenses borne by the complex of related investment companies, which includes open end and closed end investment companies for which the Investment Manager and its affiliate serve as investment manager, that are not directly attributed to the Fund, are allocated among the Fund and the other investment companies in the complex on the basis of relative net assets, except where a more appropriate allocation of expenses can otherwise be made fairly.

Expense Reduction Arrangement – Through arrangements with the Fund’s custodian and cash management bank, credits realized as a result of uninvested cash balances are used to reduce custodian expenses. No credits were realized by the Fund during the period.

NOTES TO FINANCIAL STATEMENTS - DECEMBER 31, 2009 (CONTINUED)

Distributions to Shareholders – Distributions to shareholders, which are determined in accordance with income tax regulations, are recorded on the ex-dividend date.

Income Taxes – No provision has been made for U.S. income taxes because the Fund's current intention is to continue to qualify as a regulated investment company under the Internal Revenue Code and to distribute to its shareholders substantially all of its taxable income and net realized gains. Foreign securities held by the Fund may be subject to foreign taxation. Foreign taxes, if any, are recorded based on the tax regulations and rates that exist in the foreign markets in which the Fund invests. The Fund recognizes the tax benefits of uncertain tax positions only where the position is "more likely than not" to be sustained assuming examination by tax authorities. The Fund has reviewed its tax positions and has concluded that no liability for unrecognized tax benefits should be recorded related to uncertain tax positions taken on federal, state, and local income tax returns for open tax years (2006 – 2008) or expected to be taken in the Fund's 2009 tax returns.

Use of Estimates – In preparing financial statements in conformity with accounting principles generally accepted in the United States of America ("GAAP"), management makes estimates and assumptions that affect the reported amounts of assets and liabilities as of the date of the financial statements, as well as the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

Indemnifications – The Fund indemnifies its officers and directors from certain liabilities that might arise from their performance of their duties for the Fund. Additionally, in the normal course of business, the Fund enters into contracts that contain a variety of representations and warranties and which may provide general indemnifications. The Fund's maximum exposure under these arrangements is unknown as it involves future claims that may be made against the Fund under circumstances that have not occurred.

Recently Issued Accounting Standards Updates – In January 2010, the Financial Accounting Standard Board released Accounting Standards Update ("ASU") No. 2010-06, Improving Disclosures about Fair Value Measurements. Among the new disclosures and clarifications of existing disclosures the ASU requires the Fund to disclose separately the amounts of significant transfers in and out of Level 1 and Level 2 fair value measurements and to describe the reasons for the transfers. Significance shall be judged with respect to total earnings and total assets or total liabilities. The ASU requires the Level 3 roll forward reconciliation of beginning and ending balances to be prepared on a gross basis, in particular separately presenting information about purchases, sales, issuances, and settlements. The ASU also requires disclosure of the reasons for significant transfers in and out of Level 3. The ASU is effective for interim and annual periods beginning after December 15, 2009, except for the Level 3 gross basis roll forward reconciliation which is effective for fiscal years beginning after December 15, 2010 and for interim periods within those fiscal years. The impact on the Fund's financial statements disclosures is being assessed.

2. Fees and Transactions with Related Parties

The Fund retains the Investment Manager pursuant to an Investment Management Agreement ("IMA"). Under the terms of the IMA, the Investment Manager receives a management fee, payable monthly, based on the average daily net assets of the Fund at the annual rate of 1/2 of 1%. Certain officers and directors of the Fund are officers and directors of the Investment Manager. Pursuant to the IMA, the Fund reimburses the Investment Manager for providing at cost certain administrative services comprised of compliance and accounting services. For the year ended December 31, 2009, the Fund incurred total administrative cost of \$12,036, comprised of \$8,751 and \$3,285 for compliance and accounting services, respectively.

NOTES TO FINANCIAL STATEMENTS - DECEMBER 31, 2009 (CONTINUED)

3. Distributions to Shareholders and Distributable Earnings

As of December 31, 2009, the components of distributable earnings on a tax basis were as follows:

Capital loss carryover	\$(3,465,002)
Unrealized depreciation	<u>(1,507,481)</u>
	<u><u>\$(4,972,483)</u></u>

Federal income tax regulations permit post-October net capital losses to be deferred and recognized on the tax return of the next succeeding taxable year. The difference between book basis and tax basis unrealized appreciation is attributable primarily to the income from passive foreign investment companies.

GAAP requires certain components of net assets to be reclassified between financial and tax reporting. These reclassifications have no effect on net assets or net asset value per share. For the year ended December 31, 2009, permanent differences between book and tax accounting have been reclassified by decreasing accumulated investment loss by \$3,531, decreasing accumulated net realized loss on investments by \$6,343,522 and decreasing paid in capital by \$6,347,053.

At December 31, 2009, the Fund had a net capital loss carryover of \$3,465,002, of which \$414,304, \$837,334, \$211,845, \$1,033,624 and \$967,895 expires in 2010, 2011, 2013, 2016, and 2017, respectively, that may be used to offset future realized capital gains for federal income tax purposes.

4. Fair Value Measurements

The Fund uses a three level hierarchy for fair value measurements based on the transparency of inputs to the valuation of an asset or liability. Inputs may be observable or unobservable and refer broadly to the assumptions that market participants would use in pricing the asset or liability. Observable inputs reflect the assumptions market participants would use in pricing the asset or liability based on market data obtained from sources independent of the Fund. Unobservable inputs reflect the Fund's own assumptions about the assumptions that market participants would use in pricing the asset or liability developed based on the best information available under the circumstances. The Fund's investment in its entirety is assigned a level based upon the inputs which are significant to the overall valuation. The hierarchy of inputs is summarized below.

The inputs or methodology used for valuing investments are not an indication of the risk associated with investing in those securities.

Level 1 - quoted prices in active markets for identical investments.

Level 2 - other significant observable inputs (including quoted prices for similar investments, interest rates, prepayment speeds, credit risk, etc.).

Level 3 - significant unobservable inputs (including the Fund's own assumptions in determining fair value of investments).

The following is a summary of the inputs used as of December 31, 2009 in valuing the Fund's investments:

6. Illiquid and Restricted Securities

The Fund owns securities which have a limited trading market and/or certain restrictions on trading and, therefore, may be considered illiquid and/or restricted. Such securities have been valued at fair value in accordance with the procedures described in Note 1. Due to the inherent uncertainty of valuation, these values may differ from the values that would have been used had a readily available market for the securities existed. These differences in valuation could be material. Illiquid and/or restricted securities owned at December 31, 2009 were as follows:

7. Bank Credit Facility

The Fund, Global Income Fund, Inc., Midas Fund, Inc., and Midas Special Fund, Inc. (the "Borrowers") have entered into a committed secured line of credit facility, which is subject to annual renewal, with State Street Bank & Trust Company ("SSB"), the Fund's custodian. Global Income Fund, Inc. is a closed end investment company managed by the Investment Manager, and Midas Fund, Inc. and Midas Special Fund, Inc. are open end investment companies managed by an affiliate of the Investment Manager. The aggregate amount of the credit facility is \$10,000,000 which prior to April 24, 2009 had been \$25,000,000. The borrowing of each Borrower is collateralized by the underlying investments of such Borrower. SSB will make revolving loans to a Borrower not to exceed in the aggregate outstanding at any time with respect to any one Borrower, the least of \$10,000,000, the maximum amount permitted pursuant to each Borrower's investment policies, or as permitted under the Act. The commitment fee on this facility is 0.15% per annum on the unused portion of the commitment, based on a 360 day year. All loans under this facility will be available at the Borrower's option of (i) overnight Federal funds or (ii) LIBOR (30, 60, 90 days), each as in effect from time to time, plus 1.80% per annum, calculated on the basis of actual days elapsed for a 360 day year. During the year ended December 31, 2009, the Fund did not borrow from the credit facility. At December 31, 2009, there were investment securities pledged as collateral with a value of \$187,302 and no outstanding borrowings under the credit facility.

8. Securities Lending

The Fund may lend securities to qualified financial institutions. The Fund receives compensation in the form of fees, or retains a portion of the interest on the investment in any cash received as collateral. The Fund receives as collateral cash deposits, U.S. Government securities, or bank letters of credit valued at not less than 102% of the value of the securities on loan. Cash deposits are invested in a registered money market fund. The value of the loaned securities is determined based upon the most recent closing prices and any additional required collateral is delivered to the Fund on the next business day. Any increase or decrease in the value of the securities loaned that might occur and any interest earned or dividends declared on those

NOTES TO FINANCIAL STATEMENTS - DECEMBER 31, 2009 (CONCLUDED)

securities during the term of the loan would remain in the Fund. The Fund has the right under the lending agreement to recover the securities from the borrower on demand. As with other extensions of credit, the Fund bears the risk of delay on recovery or loss of rights in the collateral should the borrower of the securities default. The Fund has the right under the lending agreement to recover the securities from the borrower on demand. The value of loaned securities and related collateral outstanding at December 31, 2009 were \$1,073,265 and \$1,117,032, respectively.

9. Foreign Securities Risk

Investing in securities of foreign issuers involves special risks which include changes in foreign exchange rates and the possibility of future adverse political and economic developments which could adversely affect the value of such securities. Moreover, securities in foreign issuers and markets may be less liquid and their prices more volatile than those of U.S. issuers and markets.

10. Capital Stock

At December 31, 2009, there were 2,610,050 shares of \$.01 par value common stock outstanding and 500,000,000 shares authorized. There were no transactions in capital stock during the years ended December 31, 2009 and 2008. At December 31, 2009, an affiliate of the Investment Manager owned approximately 24.5% of the Fund's outstanding common stock.

11. Share Repurchase Program

In accordance with Section 23(c) of the Act, the Fund may from time to time repurchase its shares in the open market at the discretion of the Board of Directors and upon such terms as the Directors shall determine. During the years ended December 31, 2009 and 2008, the Fund did not repurchase any of its shares.

12. Other Information

The Fund may at times raise cash for investment by issuing shares through one or more offerings, including rights offerings. Proceeds from any such offerings will be invested in accordance with the investment objective and policies of the Fund.

13. Subsequent Events

The Fund has evaluated the impact of all subsequent events through February 22, 2010, the date the financial statements were issued, and has determined that there were no subsequent events requiring recognition or disclosure in the financial statements.

(1) The per share amounts were calculated using the average number of common shares outstanding during the period.

(2) The amount of net investment income for the year ended December 31, 2009 was less than \$.005 per share.

(3) Total return on a market value basis is calculated assuming a purchase of common stock on the opening of the first day and a sale on the closing of the last day of each period reported. Dividends and distributions, if any, are assumed for purposes of this calculation to be reinvested at prices obtained under the Fund's Dividend Reinvestment Plan. Generally, total return on a net asset value basis will be higher than total return on a market value basis in periods where there is an increase in the discount or a decrease in the premium of the market value to the net asset value from the beginning to the end of such periods. Conversely, total return on a net asset value basis will be lower than total return on a market value basis in periods where there is a decrease in the discount or an increase in the premium of the market value to the net asset value from the beginning to the end of such periods. The calculation does not reflect brokerage commissions, if any.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Directors and Shareholders of Foxby Corp.:

We have audited the accompanying statement of assets and liabilities of Foxby Corp. (the "Fund"), including the schedule of investments as of December 31, 2009, the related statement of operations for the year then ended, the statement of changes in net assets for each of the two years in the period then ended, and the financial highlights for each of the five years in the period then ended. These financial statements and financial highlights are the responsibility of the Fund's management. Our responsibility is to express an opinion on these financial statements and financial highlights based on our audits.

We conducted our audits in accordance with auditing standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements and financial highlights are free of material misstatement. We were not engaged to perform an audit of the Fund's internal control over financial reporting. Our audits included consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Fund's internal control over financial reporting. Accordingly, we express no such opinion. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. Our procedures included confirmation of securities owned as of December 31, 2009 by correspondence with the custodian. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements and financial highlights referred to above present fairly, in all material respects, the financial position of Foxby Corp. as of December 31, 2009, the results of its operations for the year then ended, the changes in its net assets for each of the two years in the period then ended, and the financial highlights for the five years presented, in conformity with accounting principles generally accepted in the United States of America.
